Job Opening: Research Assistant

Online behavioural experiments on the evolution of cooperation

The Smerlak group at the Max Planck Institute for Mathematics in the Sciences seeks a **research assistant** to help with behavioral experiments exploring the evolution of **cooperation** in **multi-player economic games**.

Joining a young and dynamic group of evolutionary theorists, the research assistant will participate in setting up the online platform, recruiting participants, monitoring results and analyzing data.

The successful candidate will either have:

- a Bachelor's degree in social science and a strong command of statistics and programming (particularly python)
- or a Bachelor's degree in computer science and a strong interest in statistics, behavioural science and/or evolutionary theory

The contract is for one year (with a possible extension based on performance).

A resume, a cover letter and the contact of one reference should be submitted by email **before Oct 1st** 2020 for full consideration.
