

07.06.2021

08.06.2021

At the chair of Early Childhood Development, we are seeking to fill the following vacancy
from the **15th of October 2021** on:

Teaching assistant (WHK) as a tutor

(5 hours/week for 3 months: 15. October 2021-15. January 2022)

Your tasks:

Tutoring small to medium groups of students in the English-based *seminar "Introduction to R"*
in the Master program Early Childhood Education

Tasks:

- Advising and supporting students with their first experiences in using R
- Creating and supervising exercises of quantitative data analysis with R
- Checking the students' solutions to the above-mentioned exercises

Your Profile:

- advanced R-skills in regard to the typical quantitative social science / psychological research methods (e.g., restructuring data sets, descriptive and inference statistics, incl. Correlations, regressions, cluster analysis, data visualization)
- Joy and interest for teaching in English in a research-oriented Master program an (Early Childhood Research),
- very good communication skills,
- enthusiasm for R, which you would like to share with and spread to others
- Bachelor degree or very convincing track record of working with R, excellent study grades in subjects such as Data Science, Psychology, or other subjects in which the above-mentioned methods play a significant role,

We offer:

- an innovative, interdisciplinary and inspiring research environment,
- partially flexible working hours and payment according to university pay scale,
- eventually the opportunity for a long-term employment and the option of finding supervision for your final thesis

Please send your application as one pdf-document
(CV, motivation letter, study and work certificates)

until 31. July 2021 to:

Interim Professor Dr. Julia Moeller

julia.moeller@uni-leipzig.de

We are looking forward to your application!
